Currency Solutions

Welcome international customers

Businesses of every size increasingly need payment solutions which serve international customers. As one of the world's leading providers, we're used to taking a global approach to the payment process and our multi-currency solutions handle huge volumes of international sales every day. Our multi-currency features let international customers see prices and fees, and even pay, in their home currencies: enhancing their experience, reducing chargebacks and increasing your global growth prospects.

Dynamic Currency Conversion

Let your international Visa and Mastercard customers see and pay for purchases in their home currencies both in-store and online, reducing the risk of confusing future card statements and any subsequent chargebacks. Using current exchange rates for over 60 currencies, DCC does the hard work for you and even generates a rebate for your business every time it's used.

Multi-Currency Conversion

Show your international online customers prices in their own currencies with an easy-to-implement conversion solution. Simply choose the countries you want to sell to, and the currencies you want to sell in, and add them to your online store. We'll handle the exchange-rate mechanism, banking services and reporting systems, leaving you free to focus on selling online or even by mail and phone order.

International support

We'll support your multi-currency solution at every stage of the payments journey. We manage payments for over one million customers in 20 countries and our multilingual, 24/7 support team is always ready to handle issues and make sure you're getting the most out of your payment technology.
